

**AMACO VELVET UNDERGLAZES TESTED FOR MAJOLICA DECORATION**

On Arbuckle recipe, tested “normal” majolica decorating thickness application, thick application, and with a stripe of Pete’s Clear glaze over of the thick application. These were tested before AMACO made GDCs for majolica, and the Velvet formulas may have changed since that time. Test under your conditions.

No.	Color	Normal application for majolica decoration	Thick application	With thin Pete’s Clear over	Use for majolica w/o top coat of clear
